Discovering a Trusted Healthy Dog Treat

Have you been concerned with pet food recalls, the ingredients of others, and what you may be giving your dog in the way of healthy dog treats?

How can you be sure that what you are feeding your best friend is the best when it comes to a healthy dog treat choice?

Why You Should Be Concerned About Your Dog Treats

There is a huge market out there for dog treats. And you probably are part of that reason. Your giving your best friend treats right?

Behind those glossy packages with pictures of grinning, happy dogs lurks a potential health minefield—additives that could make our dogs sick, processing methods that could harm them or ingredients that are not as digestible or safe as manufacturers claim.

You should be looking out for:

- *Dog Treats from China*
- *Rawhide Chews*
- *Actual Animal Bones*
- *Other Animal Parts. ...*
- *Cancer-Causing Chemicals in Treats*
- *Sugary or Artificially Sweetened Treats*
- *Unwanted Fillers such as Corn and Wheat*

But buying those treats are so much easier than giving your dog expensive real food such as real meat and vegetables.

What do you do?

Finding a Solution for a Better Product

Bill and Joy Anderson of Grayslake ILL had your same concerns and committed themselves to do something about it.

Not wanting to endanger their 3 dogs with unhealthy food they started experimenting in their own kitchen to find an alternative option for a treat.

A treat that will not make their best friends sick.

Bill and Joy who live in the heart of farm country proceeded to locate and outsource all their ingredients from local farmers. This guarantees freshness from the organic and healthy practices these farmers use in raising their own animals and growing produce.

They Put Freshness in Bite Sized Proportions

These concerned pet owners put all these natural and organic ingredients together and baked them in their *own kitchen* to produce a healthy bite sized dog treat.

These 100% natural dog treats were made in 5 flavors:

- Chicken
- Turkey
- Lamb
- Liver
- Beef

They were also committed to create a healthy dog treat with:

- No chemical preservatives
- No artificial coloring
- No artificial flavors
- No harmful or useless fillers such as corn and flour

As a result of their labor **Puptastic Naturals** was born and *exceeds* the standards of the **FDA** (Food & Drug Administration) and the **AAFCO** (Association of American Feed Control Officials)

What more can you ask for when it comes to your dog's health and what you are feeding your best friend?

How About Hearing What Others Have To Say

"It's such a comfort to know I'm giving Bentley a healthy treat. We have been using your treats to train him on his good manners. I think your Puptastic Naturals are fantastic.

J. Jefferson

Albany NY

“Your ingredients are the real deal. And I respect that you work with local farmers that you inspect yourself. Our dogs are truly our best friends, and we will not feed them anything less than human-grade ingredients.”

C. Dale

Orlando FL

“I’m very impressed with the integrity of your business and I recommend Puptastic Naturals to all my clients looking for healthy dog treats for training or just any time. We are also proud to be one of the first veterinary clinics to carry your products.”

S. Karovski, DVM

Yuba CA

Your dog deserves these healthy food treats today

Hi Susan

Thank you so much for your interest in your dogs' health by downloading our guide.

So what about your dogs' health?

Should you be concerned with what you are giving your dog in the way of treats? Do you have any idea as to what the big players of dog food are putting into their treats?

Not to mention the recalls of some.

After doing a little research, my husband Bill and I were quite concerned about what we were giving our dogs in the way of treats. Treats we were using for rewarding them for 'that job well done.'

The FDA and Dog Treats

Yes, the Food and Drug Administration does regulate the manufacture of pet foods. And they do administer recalls on such foods for various reasons. To name a few:

- Potential Salmonella
- Elevated Levels of Aflatoxin
- Contains deficient levels of salt
- Elevated levels of copper

So far in 2021 there have been 18 pet food recalls of various products.

So instead of rewarding them with [unhealthy fillers and chemicals and other problems](#), we decided to do a little more research and came up with a 'eureka' idea.

How about making *our own* healthy dog treats using all natural, farm fresh ingredients without all those chemicals and fillers. And how about having not 1, but 5 different flavors to keep our best friends from the same old same old.

In our own kitchen we believe we have come up with some of the best dog treats that we could possibly feed to our dogs. Without chemicals or unhealthy preservatives, using only local farm fresh ingredients.

And now we are producing these 'people food quality' [healthy dog treats](#) not only for us, but also for you and yours.

At competitive pricing we offer these healthy bite sized treats in:

- Chicken
- Turkey
- Lamb
- Liver
- Beef

So I'm asking you and your [best friend take a visit to our site](#) for a look see as to what we are all about and what we have to offer in the way of healthy eats for that best friend of yours.

Thanks,

Joy Anderson-

PS We have an exciting offer going on now, but hurry, it's time limited!

Why You Might Be Giving Your Dog a Daily Harmful Treat

We all love giving our dogs a treat or two throughout the day for fun or the 'Atta boy' reward for a job well done. But have you thought about what are in those little treats?

There have been several recalls from various companies bringing back their products due to the unhealthy nature of some ingredients in their products.

And there are some which are not good at all.

We at **Puptastic Naturals** would like to inform you of a choice. *A guaranteed choice.*

A choice to choose a product with the guarantee of a natural homemade product that you will be happy and confident to feed your 'best friend'.

And we have a great deal for you also!

How Other Treats May Be Harmful

According to Alphasaw these are *some* of the treats you should avoid:

- Canine Carry Outs® Beef Flavor Dog Treats
- Pup-Peroni® Dog Treats
- Purina® Beggin' Strips Dog Treats
- Purina® Beneful Baked Delights Dog Treats
- Pedigree® Marrowbone Dog Treats

Many of these products contain wheat flour which breaks down into sugar and also contain many artificial coloring that contain unwanted chemicals.

Some have by-products such as a “Chicken-by product meal”

Yikes! What is that?

Some contain the controversial ‘filler’ corn. Some insist corn is a nutritious dog food ingredient while others denounce it as a problematic cereal grain.

One report found the incidence of corn allergy to be only 14% while another places corn at just 3% of all allergies.

And it goes on and on.

So because there such controversy as to why it should or shouldn't be, we at **Puptastics** decided not to include it as an ingredient at all.

Safer than sorry.

In June of 2021 dog treat Pup-Peroni had a recall due to mold problems. Even though they used a chemical preservative.

We found a solution to that. Read on.

Puptastic Naturals Made In ‘People Food’ Kitchen

We are not kidding!

When Bill and Joy Anderson started this company: **Furry Friends Natural Products** they decided they wanted the best for their 3 best friends.

Concerned of the recalls and chemicals of other dog foods and treats, they decided to take matters into their own hands and did the time.

Finding local farmers in Illinois who practiced chemical free growing of both vegies and livestock they pressed on to produce a healthy dog treat product that they could feel comfortable with.

And they do it in their kitchen.

Freshly baked 'people food' quality.

And now it's available to you.

5 Flavors and All Natural

Using 100% natural ingredients from those local farmers they hand selected the treats come in 5 flavors:

- Chicken
- Turkey
- Lamb
- Liver
- Beef

These bite sized treats are made with those farm fresh ingredients for protein plus eggs for more protein, brown rice, carrots, green beans, pumpkin, and sweet potatoes for fiber and added healthy nutrients.

People Food!

And for a preservative? Vitamin E. A natural preservative that also benefits your dogs' health.

According to Better Pet vitamin E will aid in:

- Improved immune system
- Improved/healthy fertility
- Better eyesight
- Shiny coat

You won't find mold growing in these healthy dog treats!

Give your Dogs What They Need Now

Our Products are available at finer pet food stores and through our website Pubtasticnaturals.com but you should also know that our products exceeds the standards of the **FDA** (Food and Drug Administration) and the **AAFCO** (Association of American Feed Control Officials)

And.....

Thank you Dr. S. Karovski of Yuba CA.

Doctor of Veterinary Medicine commented:

“In the overwhelming sea of dog treat choices out there, it’s important to find a truly healthy snack for dogs. I’m very impressed with the integrity of your business and I recommend **Puptastic Naturals** to all my clients looking for healthy treats.

How About Some Free Healthy Dog Treats for That Best Friend

As mentioned before our healthy dog treats are available at all finer and well known pet food stores from Andy’s Pet Shop in California to Pet Smart in Florida.

And all at competitive pricing.

A 32oz box (that’s 2pounds) of our dog treats are priced at \$14.99 and if you buy a box before the end of this month we will give you a coupon for a free trial sampler pack of all our healthy dog treat flavors.

That’s 5 flavors we are sure your dog will love to chow down on.

And you may be rest assured they will be a beneficial treat for that best friend of yours.

100% Money Back Guaranteed. If you are not satisfied for any reason give our customer service a call at **800-555-1234** for a full refund. We are available Monday through Friday 9AM to 6PM EST

But hurry. Click on the button, download the coupon, and get to the store or purchase [through our website](#).
